-PRESS RELEASE-

The Light Guide: Strategies for Problem-Solving and Multiple Choice Questions in Math & Science

The LMS Center is proud to offer the school community a new educational product: THE LIGHT GUIDE. Mr. Mayard, who has cumulated over 10 years of experience in teaching mathematics and physics, has developed a guide that contains multiple choice questions and problem-solving strategies for mathematics and science exams.

"The strategies of Mr. Mayard helped me score a 98% in my final high school physics exam." Laura Green, Dawson college & 2016 recipient of the McGill Science Award and the Governor medal

"As an educator, I have used the Mayard Method (strategy) because it can be applied effectively to many problems, and subsequently it can help students develop intuition for the problem-solving process as a whole." Franco La Braca, Honor program in Physics (McGill University), Recipient of the 2015 Garnet Wooton Award in physics (McGill University) & Recipient of the scholarship from Vanier College.

This guide is like a pocket lamp that will enlighten and guide the students in their academic hike toward success and excellence. For the students, these strategies are essential tools to optimize the results in their mathematics and science exams; while for teachers and parents, these strategies are simple and effective instructional tools that help lead their children in solving problems and multiple choice questions. Surely, the entire school community will benefit greatly of this work. This unique and exceptional product is on sale right now in our online store. The LMS team wishes the entire school community academic excellence for the year 2017.
